# We welcome you to HOSPITAL + INNOVATION CONGRESS

Region Southern Denmark are pleased to welcome you to Odense, Denmark to the Hospital + Innovation Congress & exhibition. The congress will take place on 30<sup>th</sup> September – 1<sup>st</sup> October in Odense, Denmark.

The new Hospital + Innovation Congress & exhibition has been launched to create optimal possibilities for innovation in new hospital buildings. Denmark is currently in the process of building 16 new hospitals, investing over 5 Billion  $\pounds$ . To ensure the new hospitals will offer the most innovative IT solutions, products and services, the Region of Southern Denmark is inviting international stakeholders to work together and co-create the future of healthcare by transforming the way patients, care givers, governments, social services, and industry innovate and implement services and solutions.

The congress will facilitate new and long-term partnerships and relations between the public and private actors who are attending.

We encourage you to support Region Southern Denmark's effort to bring together the most competent vendors, physicians, nurses, procurement officers, consultants and policy makers with the purpose of identifying the right partners to create the best holistic and sustainable healthcare solutions.

The congress program is as a combination of contributions from Danish and international keynote speakers and interactive workshops that will contribute to the understanding of how to create a health care system which ultimately focuses on the individual patient's needs, e.g. through flexible hospitals, modern management and telemedicine.

We expect approximately 300 international delegates. Region Southern Denmark is working hard to ensure the outstanding quality and success of the congress.

The congress program is designed as a combination of contributions from Danish and international keynote speakers and open innovation workshops that will contribute to the understanding of how to create a health care system which ultimately focuses on the individual patient's needs, e.g. through flexible hospitals, modern management and telemedicine.

# The congress focuses on four main themes:

- Taking Flexible hospital Construction to the next Level
- Hospital design to reduce adverse events
- Care at distance a new partnership between
  hospital and patient
- Psychiatric Hospital Construction

# **Benefits of joining**

- Insight into the cutting edge of hospital construction projects
- Insights into the newest trends within solutions
   for hospital construction as well as treatment in
   the home
- A unique possibility to work on your challenge
  together with Danish and international partners
- The possibility of creating new international partnerships on specific issues
- The possibility to practice "open innovation" within a public/private partnership framework

# **PROGRAM AT A GLANCE**

| Monday, September 30. 2013 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                      |                                                                                                       |                                                                 |  |  |  |  |
